SOCIETY**

Cumann Lucht Capaillíní Chonamara
Connemara Pony Breeders' Society

2026 STALLION REGISTER

Revised 06 March 2026

This stallion register has been compiled from records in the Connemara Pony Breeders' Society database and information where appropriate supplied by owners. In the case of Hoof Wall Separation Disease, the CPBS does not accept any responsibility where the HWSD result has been supplied as a private test. Results of private tests for HWSD are denoted by an asterisk* (e.g. N/N*).

For enquires please email cliona@cpbs.ie

Applications can be made via this link <https://form.jotform.com/250284525558058>

HWSD – Hoof Wall Separation Disease

Connemara breeders, and indeed purchasers of Connemara ponies, should be aware of HWSD, a disease with which a pony can be born. It is a serious inherited disease in that it causes the breakdown of the hoof wall, and whilst sometimes it can be managed in a good environment, it is incurable and often results in the affected pony having to be intensively managed (a welfare issue) or having to be put down. It is not white line disease, and it is not caused by the environment.

Since 2016, it is a prerequisite of the Society that all foals should be tested for Hoof Wall Separation Disease (HWSD) prior to registration. The result has no influence on the registration of the pony. Ponies of N/N parentage (sire and dam) are not required to be tested.

Private HWSD test results are accepted by the CPBS on application to the Society and on production of a copy of the test certificate from an approved laboratory. This copy is held on file at the CPBS Office. Private test results published on the official database and in publications of the Society are distinguished by an asterisk.

The CPBS HWSD results are published on the CPBS Online Pedigree Database and recorded in the Lifetime Identification Document and on the zootechnical certificate for the pony.

It is a prerequisite of the Society that older stallions be tested for HWSD prior to Inspection unless both parents' test result is N/N. DNA sample for this test may be taken on day of inspection.

Genetic testing of a pony will give one of three results:

1. Affected (HWSD/HWSD)
2. Carrier (N/HWSD)
3. Non-Carrier (N/N)

It is an inexpensive DNA test readily available. For further information please refer to **www.cpbs.ie** which explains the problem in full, or follow the link to download or complete a CPBS test application form:

<https://cpbs.ie/hwsd-hoof-wall-separation-disease-testing-services/>

TRANSITION TO SNP - THE FUTURE OF EQUINE GENOTYPING

SNP - MS TRANSITION EXPLAINED

MS: Microsatellite; SNP: Single Nucleotide Polymorphism

There are no additional charges for any of the required studbook SNP sample testing. The sire, dam and foal SNP sampling is funded. Foal samples are funded at 70% by the Department of Agriculture, Food, and the Marine Equine (DAFM) Equine Technical Support fund, the remaining 30% is covered by the studbook foal registration cost. The sire and dam SNP sample testing is funded at 100% through the Horse Sport Ireland National Breeding Services, funded by the DAFM. MS testing is no longer supported by the DAFM/studbooks.

SNP funding does not extend to foal or adult horses registered under identification documents (non-studbook passports). Please contact your DAFM approved Passport Issuing Organisation (PIO) if you have any additional queries.

A. SIRE: The sire is **SNP** typed.

DAM: The dam is **SNP** typed.

FOAL: The breeder is only required to submit one (**SNP**) hair sample for the foal.

B. SIRE: The sire is **SNP** typed.

DAM: The dam is **MS** typed only. The breeder must submit a hair sample for dam **SNP** typing. If a dam **SNP** sample cannot be submitted, the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

FOAL: If a dam **SNP** sample is received, the breeder is only required to submit one (**SNP**) hair sample for the foal. If a dam **SNP** sample cannot be submitted; the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

C. SIRE: The sire is **MS** typed only. The breeder/stallion owner/agent must submit a hair/straw sample for sire **SNP** typing. If a sire **SNP** sample cannot be submitted; the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

DAM: The dam is **MS** typed only. The breeder must submit a hair sample for dam **SNP** typing. If a dam **SNP** sample cannot be submitted; the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

FOAL: If a dam and sire **SNP** sample is received*, the breeder is only required to submit one (**SNP**) hair sample for the foal. If a dam and sire **SNP** sample cannot be submitted; the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

*An **MS** sample is still required if only one parent submits a sample for **SNP** typing. A breeder will only ever be required to submit a maximum of two samples for the foal, one for **MS** and one for **SNP**.

D. SIRE The sire is **MS** typed. The breeder/stallion owner/agent must submit a hair/straw sample for sire **SNP** typing. If a sire **SNP** sample cannot be submitted, the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

DAM: The dam is **SNP** typed.

FOAL: If a sire **SNP** sample is received, the breeder is only required to submit one (**SNP**) hair sample for the foal. If a sire **SNP** sample cannot be submitted, the breeder must purchase and submit a second foal sample for **MS** typing to obtain the foal's studbook passport.

Frequently Asked Questions

What kind of sample is required?

Good hair sampling is imperative for a successful transition. A minimum of 50 clean, intact hairs pulled from the root must be submitted to the PIO for SNP sampling. These hairs must have the follicle/hair bulb intact. Please ensure there is no soap or other residue on these hairs.

What is the cost?

There is no cost to the breeder for SNP testing of the sire, dam or foal.

Dam/Sire SNP testing is supported by the DAFM-HSI National Breeding Services at 100%.

Foal SNP typing is supported by the DAFM Equine Technical Support fund at 70%, the other 30% is included in the studbook registration fee.

I am breeding from a non-pregnant OR maiden mare; will she be on SNP?

She may be on the platform if she has foaled in the previous three years OR engaged in previous National Breeding Service schemes. Please contact your PIO for confirmation or to receive a sample bag to submit for SNP testing ahead of foaling.

I am a stallion owner/agent, what do I do?

It is not possible for any PIO to predict all potential breeding stallions for inclusion in the reference library. If you are a stallion owner or agent, you are obliged to ensure that your stallion meets the DNA testing requirements of the studbooks for which the progeny is to be entered. DAFM has declared that SNP is the DNA platform to be applied by the sport horse sector in Ireland. Please contact your PIO to determine if a sample is required for the standing stallion(s).

Microsatellites (MS)

- MS requires a change in a pattern of DNA, a pattern is made up to 2 – 6 markers
- Parentage testing using MS markers looks at between 14 to 17 locations on the horse's DNA sequence
- MS testing capacity is limited to approximately 1,500 – 2,000 samples per week
- If your foal sample must go through MS testing this incurs further testing charges

Single Nucleotide Polymorphism (SNPs)

- SNP looks for single changes in base pairs/nucleotides, it can analyse many more areas of the gene
- The SNP chip utilised in the project analyses 80,000 markers on equine DNA, hence there is greater detail obtained from the same hair sample
- Weatherbys estimate a capacity to SNP test up to 20,000 samples per week
- Traits will be identified on the same hair sample in future i.e. Hoof Wall Separation
- Greater accuracy of imputation
- Potential to do further integrative research on health, performance, and other notable traits (Osteochondrosis, Colour, Fragile Foal Syndrome, etc)

To check if your pony has been SNP tested, this can be viewed on the CPBS Online Database

If your stallion has not got a SNP profile, please contact cliona@cpbs.ie

LINKS / COMMENTS: Negative for the Cream gene. He is a super stamp of a Connemara pony he has correct conformation, a beautiful head, fab floating movement and lovely temperament. All of these attributes he is passing on to his offspring who are proving to be very successful in both the show and sales ring. He produced 2 of the top priced colt foals in Clifden Pony sales in October 2025. He also produced the winner of the colt foal Class at Clifden Pony show in 2024. He has some super bloodlines including Rynn Richard, Moy Johnny's Pride and Glencarrig Sparrow. He is available by Natural Covering or fresh/chilled semen. Payment on first cover.

Equine Premises Number

What is it an EPRN?

- A Unique ID for a location where horses are kept in Ireland, required by The Department of Agriculture, Food and the Marine (DAFM).
- If there are other species on the establishment (such as sheep or cattle), the EPRN will be the same as the flock/herd number.
- It is necessary to notify the Regional Veterinary office (RVO) of the intention to keep horses by submitting a completed EPRN form.

How do you get an EPRN?

- Contact your local Regional Veterinary Office.
- Fill in a HR1 Form. This can be found on the DAFM website or by clicking [here](#)
- Registration is free of charge.

If you do not register your premises:

- Could face prosecution, as it's a legal requirement.
- Can face a fine of up to €10,000.
- You will not be able to register your horse, obtain a passport or have your horse slaughtered for human consumption.

Other information

- A valid EPRN is necessary to apply for an equine passport.
- Failure to return a census or submission of a nil return, can result in EPRN being made inactive on the department's systems.

Herd owner: means an operator" as defined in EU Regulation 2016/429 who has a beneficial interest in a herd.

Keeper: means an operator as defined in EU regulation 2016/429 who is registered as the keeper of a herd and who is, irrespective of ownership, responsible for the day-to-day care and welfare of the herd.

A herdowner, who is not the keeper, shall be considered responsible with the keeper for the herd and the holding for the purposes of these Regulations

If you keep your horse at a livery yard - the livery yard owner will an EPRN
